Performance Report
"Pocahontas County Broadband Project"

Background:

The Pocahontas County Broadband Project will provide approximately 49 miles of aerial fiber to service to 24 businesses and 1,011 households in the Proposed Funded Service Area (PFSA) stretching from Marlinton east to Minnehaha Springs and north to Dunmore. The majority of the PFSA is in Pocahontas County's federally mandated National Radio Quiet Zone (NRQZ), where the use of any electrical equipment (including permanent, fixed, wireless licensed transmitter services) that causes interference to Radio Astronomical Observation is prohibited within a ten-mile radius of the Green Bank Observatory. Due to the inability to use fixed wireless for last mile service in this rural, sparsely populated area, residents and businesses in the PFSA will never have access to broadband without federal assistance. With $2.5 million in ARC POWER funds matched with $1,083,000 in ISP investment, Pocahontas County Commission will deploy a fiber-to-the-premises (FTTP) network solution that will provide gigabit-speed broadband service, next generation IPTV video television services, and quality voice services to the rural households, farms, businesses, critical care facilities, and educational facilities located in the PFSA. Providing access to highspeed broadband services to residents, businesses, and institutions in the PFSA will help Pocahontas County to advance economic recovery from coal decline and COVID-19 by supporting small businesses, spurring tourism development, expanding telemedicine access, and establishing remote work capabilities. The newly formed Pocahontas Broadband Council will conduct educational outreach to increase adoption and maximize economic benefit of the fiber deployment.

Recent/Upcoming Activities:

The Grant Agreement for this project was received and executed in September 2020. Thompson & Litton, Inc was properly procured and selected as the project Consultant. Region 4 Planning and Development Council will provide project administration.

Internet Service Provider Citynet has been procured as the Service Provider for the project.

Consultant Thompson & Litton is working with Citynet on the project design.

A Time Extension has been requested and approved to amend the Period of Performance to 10/01/21-09/30/26.

A drawdown request in the amount of $7,195.43 is being made to reimburse Frontier Communications for Make Ready work completed during the time period 10/23/2025-10/24/2025.

i) The Pocahontas County ARC Broadband project realized a Bid Overrun of approximately $613,139. It has been determined the Overrun was realized due to unexpected Make Ready expenses. To help ensure the success of the project the Pocahontas County Commission has committed an additional $202,000. The project also plans to utilize $200,000 from project Contingency, in addition the Pocahontas County Commission requested an additional $300,000 from the WV Office of Broadband to cover the remaining Bid Overrun, utilizing $211,139 to help cover the cost of the Bid Overrun and $88,861 to replenish the project contingency. The WV Department of Economic Development Office approved the request for additional funding, allowing the Pocahontas County ARC Broadband project to be fully funded.

j) The project's Legal Counsel is working with the selected Contractor (Quanta Telecommunication Solutions, LLC) on a final contract for review and consideration by the Pocahontas County Commission.

k) The Pocahontas County Commission has approved the final contract between Quanta Telecommunication Solutions, LLC and the Pocahontas County Commission.
